- Centralized monitoring events from DVR stations in territory and alarm in fixated conditions;
- Centralized monitoring events from LPR stations in territory and alarm in fixated conditions;
- Enabling to alarmed DVR stations from distance IN/OUT alarms from distance

SOFTRUST COMPUTERS addresses to important business people and companies, suggesting a large scale of management solutions, consultancy and assistance in acquisition and digital-video, audio data integrated domain.

The customer expects today, more than ever, “**solutions**”, no “**simple products**”. We don’t have time to generate intern solutions; we expect them to be projected and delivered on the package. Nice wrought -up, named intelligently, and, eventually pre-checked by other clients, with well-known names.

The customer has no time to expect months or years for implementing a complex project. He wants the solution the very next day signing contract for using and applying it to obtain positives effect immediately.

**SOFTRUST COMPUTERS** delivers **complete solutions**, not simple products, that we created, together with our collaborators we’ve implemented them and, with our beneficiary we’ve checked them.
